EDUCATION

Central University of Finance and Economics (CUFE)

Sep 2023 - Expected Jul 2027

Major: Statistics (Statistics and Finance Dual Bachelor's Degree)

- GPA: 89.73/100, Ranked: 6/21.
- Selected coursework: Regression Analysis (100), Quantitative Risk Management (100), Introduction to Fintech (99), A.I.Economics (98), Distributed System and Big Data Analytics (97), Financial Risk Management (97), Probability Theory (97), Time Series Analysis (96), Security Investment (99), C Programming (97), and Data Mining (95).

RESEARCH EXPERIENCE

Managerial Shareholding Incentives and Systemic Financial Risk: A Perspective from Common Ownership and MD&A Textual Similarity Networks

Jun 2025 - May 2026

Co-first Author | Supervisor: Prof. Lu Deng

- Examined how managerial shareholding affects systemic risk spillovers and how firms' positions in common-ownership and MD&A topic-similarity networks moderate this relationship.
- Measured systemic risk contributions using $\Delta CoVaR$; constructed a common-ownership network and a Sentence-LDA-based network from annual-report MD&A texts; estimated dynamic two-way fixed-effects panel models with interaction terms for network centrality and managerial shareholding.

Digital Strategic Orientation and Risk-Network Positions of Chinese Commercial Banks

May 2026 - Jun 2026

Independent Researcher

- Investigated how banks' digital configurations relate to their centrality in risk-spillover networks. Developed a novel classification of digital strategies into front-end (customer-oriented) and back-end (support-oriented) strategies.
- Applied FinBERT to sentence-level identification in annual-report MD&A texts and used the TVP-VAR-DY method to construct dynamic interbank risk-spillover networks.

Financial Market Risk Spillovers and Contagion Paths Based on Granger Causality and Spatiotemporal Graph Networks

Mar 2025 - Present

First Author | Supervisor: Assoc. Prof. Yifeng Zhu

- Constructed dynamic directed graphs using Granger causality tests and combined GARCH models with a graph attention network (GAT) to jointly forecast next-day risk levels and risk-propagation directions.
- Applied the framework to Chinese Level-1 industry indices and global equity-market data, extracting GAT attention-weight matrices across different market states to dynamically map and compare risk-transmission pathways.

How Does the Delayed-Retirement Policy Affect Household Savings? A Policy-Expectation-Economic-Behaviour Transmission Study Using Search-Index Data

Dec 2025 - Present

Independent Researcher

- Used Baidu Search Index as a proxy for expectations about the delayed-retirement policy and a 2006-2024 panel of 286 Chinese cities to examine dynamic effects on household saving rates.

- Integrated the life-cycle hypothesis and precautionary-saving theory with an attention mechanism from behavioural finance in a macroeconomic study.

Frontier FinTech Risk-Monitoring Platform (Beijing Municipal Science and Technology Commission Special Project)

Jan 2025 - Sep 2025

Core Team Member / Research Assistant | **Supervisor: Assoc. Prof. Yushan Xue**

- Independently scraped financial regulations and standards; extracted, segmented, and cleaned PDF texts; performed stop-word removal and tokenisation with existing and self-built dictionaries.
- Designed an entity-relation framework for a knowledge graph and used large language models to extract entities and relations, producing structured inputs for downstream models.

SELECTED AWARDS & ACADEMIC RECOGNITION

- Excellent Paper Award (Poster Presentation), 2nd National Undergraduate Statistics Forum | Jun 2026
- Second Prize, 25th CUFU “Challenge Cup” Student Extracurricular Academic Science and Technology Works Competition | Jun 2026
- First Prize (Ranked 1st) and Best Performer, 9th Global University Green Finance Research Competition | Apr 2026
- First Prize, Undergraduate Group, Beijing Division, 11th National College Student Statistical Modeling Competition | Aug 2025
- Second Prize, National Round, 9th “Puyi Award” National College Student Translation Competition (English-to-Chinese Category) | Jul 2025
- Honorable Mention, 2025 Mathematical Contest in Modeling (MCM) | May 2025
- First Prize, CUFU Campus Round, 15th National E-commerce “Innovation, Creativity and Entrepreneurship” Competition for College Students | May 2025
- Silver Award, English Comprehensive Category, Beijing Regional Round, 2024 “FLTRP·ETIC Cup” “Understanding Contemporary China” National Foreign Language Contest for College Students | Nov 2024
- Third Prize, Type C, 2024 National English Competition for College Students (NECCS) | May 2024

ACADEMIC ACTIVITIES & LEADERSHIP

- | | |
|--|---------------------|
| Co-first Author and Poster Presenter, 2nd National Undergraduate Statistics Forum
<i>Excellent Paper Award</i> | May 2026 |
| President, Qianfan Mathematics Society, CUFU
<i>Launched two WeChat article series, planned the first CUFU Mathematics Culture Festival, and established the university's first Mathematics Culture Corner.</i> | Sep 2024 - Jul 2025 |
| Vice President, Tianlai Guqin Society, CUFU
<i>Assisted in organising the CUFU Chinese Studies Culture Festival.</i> | Sep 2024 - Jul 2025 |
| Participant, CUFU Social Practice Projects on Rural Revitalization
<i>Participated in three field-based research and service projects in Chengdu, Liangshan, and Ningde; the project teams received a college-level First Prize, a college-level Second Prize, and university-level project approval.</i> | Jul 2024 - Sep 2025 |

TECHNICAL SKILLS & LANGUAGE

Programming and data analysis: Python, R, MATLAB; additional exposure to C, SQL, and Linux.

Typesetting and productivity: LaTeX, Typst, Microsoft Word, PowerPoint, and Excel.

English: CET-6: 574 (Jun 2024).
